

CONTENTS

Introduction.....	7
I THEORETICAL SECTION.....	9
1 Hearing disabilities.....	9
2 Family and examination thereof.....	11
2.1 Fundamental characteristics of examination of the family.....	15
2.2 Family stress, family crisis and coping.....	19
2.3 Family crisis.....	20
2.3.1 Family developmental crises.....	21
2.3.2 Family crisis as a result of non-normative event.....	24
2.3.3 Family resiliency model.....	29
2.4 Coping.....	36
2.4.1 Individual coping processes.....	41
2.4.2 Family coping.....	45
2.4.2.1 Adaptation mechanisms of the resiliency model.....	47
2.4.2.2 Graded models of family coping.....	57
3 Family crises and coping in families with physically disabled children.....	61
3.1 Family with child with hearing disability.....	75
3.1.1 Siblings of child with hearing disability.....	82
3.2 Stress and coping examined in families of hearing impaired children.....	84
3.3 Most frequent manifestations of coping behaviour in parents of disabled children.....	95
II RESEARCH SECTION.....	99
1 Overview of the main theoretical resources.....	99
2 Aims of the study.....	100
3 Methodology.....	102
3.1 Family anamnesis.....	103
3.2 Visit to family.....	104
3.3 Interview.....	106
3.4 CHIP.....	107
3.5 Logo-test.....	110

4	Research sample	111
5	Organisation and course of study	121
6	Results.....	128
7	Selected case studies	135
8	Discussion	144
9	Conclusion	149
10	References	153
11	Appendices.....	157
11.1	CHIP – The Coping Health Inventory for Parents	157
11.2	Characteristics of families.....	165
11.3	Number of children	166
11.4	Hereditary disorder.....	167
11.5	Sign language.....	168
11.6	Care.....	169
11.7	Visits.....	170
11.8	Age of parents.....	172
11.9	Education and employment of parents	172
11.10	Sex.....	174
11.11	Severity of hearing disorder.....	175
11.12	Discovery of disorder	175
11.13	Intellectual capabilities	176
11.14	Education	176
